

TARA

SYSTEMS

APPLICATIONS

- *Hanging scale with wireless digital transmitter built-in
- *Read the weight at a safe distance
- *Hang from cranes, forklifts, and other lifting devices.
- *Receiver can be used with a wide variety of digital scale indicators

MODEL TCS

WIRELESS HANGING & CRANE SCALE

FEATURES

Offered in 4 capacities.
Internal rechargeable battery system.

Long range radio transmitter with ID to specific receiver, allows for multiple units being used in same location.

1/4 inch steel protection
Made in U.S.A.

Receiver shown with TR-1-NK digital scale indicator

FEATURES

The model TCS digital scale system can be used for all types of lifting and weighing applications.

The heavy duty load-cell is all steel and has no moving parts for long and trouble free operation.

Internal rechargeable battery system allows for a continuous operation of 270 hours before recharging.

If the receiver is turned off, the TCS unit goes into a sleep mode to save battery power. All units are paired with a coded receiver to allow the use of multiple units in the same area.

A 300 foot line of sight range between the TCS and the receiver allow the scale indicator and accessories to be used in a safe area.

The receiver can be attached to all types of digital scale indicators for a wide variety of scale system applications and accessory interfaces.

4 capacities available. Larger systems by request.

5000 lb 10,000 lb 15,000 lb 20,000 lb

Enclosure1/2 painted steel

Load cell.....All plated steel and temperature compensated

Humidity.....0 to 80% non-condensing

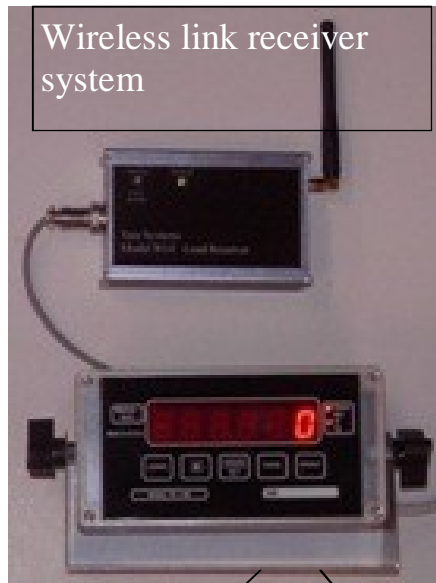

Power Internal rechargeable battery pack

Made in U.S.A.
